Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Thursday 07 Jan 2021

UK Outlook for Friday 22 Jan 2021 to Friday 5 Feb 2021:
Confidence for this period is low, though there is a signal for winds from the west to weaken which perhaps allows conditions, at least in the north, to become drier and for temperatures to be around average to a little below. The south is more likely to see unsettled conditions with the potential for milder than average temperatures here, but this will also bring a risk of further snow where this meets the colder conditions to the north.
